PEONIES
For Pleasure and Profit

Iris, Phlox, and other Perennials

1920 SUPPLEMENT
to our Spring Catalogue

S. G. HARRIS, Peony Specialist
TARRYTOWN, N. Y.
PEONIES FOR FALL PLANTING

No flowers exceed the Peonies in popularity and are more easily grown. They are seldom attacked by insects or disease, and are perfectly hardy, requiring no covering in the severest winters. They thrive in all kinds of soil and flourish in a rich, deep loam. They demand much moisture at blooming time, and if grown in partial shade the blooms will, therefore, last longer and be equally fine in other respects.

No hardy perennial is of more permanent value than the Peony. The first cost is the only one and they continue to increase in size and value for many years. The foliage is rich and of beautiful deep green color, which renders the plant very ornamental even when out of flower, and few other flowers are so well adapted for interior decoration and none make more massive color effect when planted in a border or in a bed on the lawn. Their popularity has increased during the past few years since the new improved varieties have been disseminated. Peonies range in color from cream and pure white through the various shades of pink and red to the deepest purple and maroon, in all possible combinations of tint and form.

Suitable Places for Peonies

Since peonies are very decorative in all situations not only because of the splendor of their blooms but also from their attractive foliage, they are not out of place in almost any location. Care should be taken, however, not to plant them too near the spreading roots of trees and shrubs which would rob them of nourishment and moisture, but partial shade from trees at a distance is beneficial. Peonies make a very attractive border along a path or driveway, especially if planted alternately with phlox so that the season of bloom may be continued most of the summer. They are also very effective in large beds, either alone or interspersed with Japanese Lilies which bloom in August. If desired for abundance of cut flowers only, they may be planted in the vegetable garden.

Suggestions for Peony Collections

Most helpful suggestions as to making a collection of peonies may be found in an able article, "Everyman's Peonies," by Prof. A. P. Saunders, Secretary of the American Peony Society, in the September, 1916, "Garden Magazine," a portion of which we quote herewith. He says:

"It is a mistake to suppose that all the best Peonies are of recent origin, and therefore high in price. Many sorts that have been on the market for half a century, and are now quite cheap, are still so good that they should be in every collection, and some are still stubbornly contesting with the newcomers grown to be considered the finest in their class. There is, then, no difficulty in choosing from among the numerous sorts a group of half a dozen whose quality is extra. Duchesse de Nemours (Calot). White. Festiva maxima. White. Jeanne d'Arc. Cream and pink. Mlle. Leonie Calot. Pale pink. Philomèle. Pink and yellow. Marie Lemoine. White (late). Of the above varieties there is not one but will unfold new wonders of delight if some of its blooms are brought indoors. Every one of the varieties given will be a delight not only out of doors but in the house as well.

If we may continue this list to include a second half dozen, selling a little higher in price, I would name as of unexceptionable quality, these:

And if more were desired at this level of price, it would be safe to add: Eugenie Verdier, Glorie de Charles Gombault La Rosiere, Monseigneur Dupont, Triomphe de l'Exposition de Lille.

This gives such a collection as any one might be happy to own. But there are some buyers who are not happy in following suggestions made under a price limit, and for such, I give now a list of

BEST PEONIES REGARDLESS OF COST

In a list of the fifty best Peonies, I should include all or almost all of those named above, in addition to other more costly kinds.

Regardless of anything, then, except the sheer beauty of the flower, my choice of the very cream of what we now have would include these sorts: Therese, Le Cygne, Mme. Emile Galle, Albatre or Avalanche—two varieties almost if not quite identical, Marie Crousse, Grandiflora, James Kelway, Venus, Duchesse de Nemours (Calot), Jeanne d'Arc, Philomèle, Marie Lemoine, Eugène Verdier, Mme. Boulangier, Baroness Schroeder, Mme. Leonie Calot, Milton Hill, Carnea Elegans (Calot)."

Prof. Saunders confesses he is not fond of deeper pinks and reds but for those who desire these colors names the following: Mon. Jules Elie, Livingston, Kelway's Queen, Albert Crousse, Claire Dubois, Felix Crousse, Edouard Andre, Mon. Martin Cahuzac, Adolph Rosseau and Volcan.

He further says: "Some single Peonies, like great Wild Roses with hearts of gold, should certainly be included in your collection."

No higher eulogium for our Peonies could be given than this: An old customer from New Jersey recently sent us his order for 1,500 plants. To grow cut flowers for market, he must have strong, healthy stock.
To ROSEDALE NURSERIES, TARRYTOWN, N. Y.

I desire to order the list of stock specified below, for which enclosed find...
in payment.

Culture of the Peony

The Peony is of exceedingly easy culture, perfectly hardy and not very particular about the nature of the soil, but is particular about having good fertility.

SOIL. To perfect so many large blossoms as a good clump of Peonies will set, the soil should be well prepared so that plenty of nourishment as well as moisture may be had at blooming time. Although any good fertiliser, if well incorporated with the soil, will do, none is better than well rotted cow manure, which should be used in liberal quantities, but placed far enough below the roots so that the rootlets will not be affected by it until they have well started to grow. If the subsoil is of a good loamy texture, the excavation of two feet with a layer of six inches of well rotted cow manure at the bottom, well spaded in, will be sufficient. If, however, the subsoil is of the nature of light sand or hardpan, it should be removed entirely and alternate layers of old sods and manure put in its place. Heavy clay should be lightened by the aid of sand, leaf mold and manure, mixing it thoroughly by overturning it several times.

PLANTING. The time to plant Peonies is September and October, although they may be safely planted whenever the ground is open until April 1st. Do not plant before September 5th lest the roots should not be well ripened; and do not leave the matter until spring, for they are sure to make considerable growth before the ground is workable. Like other plants, the roots should be planted at the proper depth and the earth very tightly packed among and over them. Be sure to set the eyes three or four inches below the surface. Plants should be set at least three feet apart so that they will have ample room for development.

After the ground is frozen to a depth of two or three inches it is well to cover the plants the first season with a light dressing of manure to keep them from heaving by the frost. They do not need to have protection from the cold and will not need it after the first winter as the roots will have fast hold of the ground and will endure the most severe climate. If covered too deeply or planted too deeply they are apt to send up blind buds.

CULTIVATION. In early spring as soon as the ground has dried out sufficiently, the soil about the plant should be dug over to work in the manure and pulverize the soil. Shallow cultivation should be continued at intervals all summer to maintain the dust mulch.

A good way to utilize the ground the first season or two is to plant a row of Phlox between the rows of Peonies. Should there be an extreme drought in April or May, a thorough drenching of the beds once or twice a week would well repay in extra bloom. As Phloxes are fond of the same treatment these plants thrive well together, the latter giving a succession of bloom for two months after the Peonies are over.

If large, individual blooms are desired, the lateral buds should be removed early, thus throwing all the strength into the one central bud; and, if exhibition blooms are wanted, several of the stems may be pinched off when they first emerge from the ground, leaving two or three of the stronger ones which will take the entire strength of the plant. An application of liquid manure to the roots once a week soon after the buds have formed, will also increase the size and color of the flower.

AS A CUT FLOWER the Peony is unexcelled. Cut when the first outer petal rolls back and place in a cool room, always giving the flower stems a fresh cut every day, and also fresh water. The moment the buds are cut they should be dropped into a bucket of water. Developed in this way, most varieties will last a week. To retard them several days place them in a room that is cool and dark. In this way they may be kept beyond their period of bloom and will open larger and of better color than those left on the plant.
A Month of Peonies According to Color

Let us help you select early, midseason and late varieties so as to give a month of white, a month of yellow, a month of light pink, a month of deep pink, a month of red or a month of purple.

In the following list of Peonies according to color, we have indicated by the letters “E”—early; “M”—midseason; and “L”—late varieties. These are still further differentiated, very early, early midseason, late midseason, very late, in the descriptions in the full alphabetical list.

The earliest to bloom are the Officialis varieties, which begin blooming in this vicinity about May 20th, the season closing June 25th to July 4th with such varieties as Grandiflora, Madame de Galhau, Madame Emile Galle, Maria Lemoine, Purpurea Superba, and others.

Peonies True to Name

Having a large stock from which I send out only plants of my own growing, I can warrant the authenticity of the varieties. I have been most careful in purchasing stock from thoroughly reliable sources.

I have been taking the utmost care from year to year to keep them pure.

All synonyms.
All the inferior varieties.
All the varieties of doubtful authenticity are rigorously excluded.

The new varieties of Peonies are so attractive that I have been delighted to spend much time in June amongst them during the 16 years I have been making them my leading fall specialty. I pride myself on the fact that I have many of the finest varieties in cultivation for which I have been awarded first prizes by the American Peony Society at their annual exhibitions.
A Basket of Scarce, New Varieties

ASK FOR SPECIAL LIST FOR CONNOISSEURS

PRICES

For the high quality of plants we offer our prices are very reasonable. While we do not laud certain varieties to the skies and charge a double price for them, yet our prices for some varieties will, perhaps, be found to vary from those of some other growers. Price as a rule is regulated by the supply and demand; but, in the case of Peonies, the price is often regulated as well by the number of plants one may have of certain varieties. Another reason that makes prices vary is that one variety may increase two or three times as rapidly as another, being a stronger grower. Thus, the fact that a Peony is sold cheaply may be a high recommendation for it; e.g., Couronne d'Or, a favorite white variety, strong grower and free bloomer (therefore greatly in demand) has decreased in price, although of recent introduction, because of its rapid increase, while Livingstone and Festiva Maxima, slower multipliers have kept up in price. We have made our prices in accordance with our motto: "Prices as Low as Consistent with Highest Quality." Every year about one-third of our roots are made into divisions of three to five eyes, re-planted and sold the following years for one, two and three-year plants respectively. Practically every one of our plants blooms in the nursery the first year, some having as many as three or four blooms. Such stock, of course, gives satisfaction and brings us new orders from our customers and their friends.

DISCOUNT ON PEONIES

On orders of not less than three plants of a kind and amounting to $10.00 to $50.00, we will make a discount of 10 per cent; on orders of $50.00 and up, 15 per cent.

No charge for boxing and packing.

Discounts do not apply to special offer.

SPECIAL OFFER

To those wishing plants for mass planting, or cut-flowers, and not particular about names we offer a bargain: Strong 1-year clumps to color, $1.50 per dozen, $30.00 per 100. Strong 2-year clumps to color $7.00 per dozen, $50.00 per 100; fifty at hundred rate.
Description and Price List of Peonies

The varieties we offer are arranged in two classes, double and single, in each of which the names are arranged alphabetically, and where known, the name and date of the introducer immediately follows in parentheses. As color comes first in the choice of Peonies, we have placed the color on the same line as the name. Size and type naturally appeal next, and so follow the color. Having found these satisfactory in any variety described, one naturally next looks for the character and habit of the plant. To further aid purchasers we have made an alphabetical list of colors. See page 4. In addition, we shall be pleased to give by letter further information to intending purchasers.

See discounts, page 5. No charge for boxing and packing.

Peonies and Iris

1-year 2-year 3-year

**Augustin d’Hour.** (Calot, 1867). Dark, brilliant, solferino-red, silvery reflex. Medium to large, bomb-shape; showy bloom; medium height. Midseason. (Similar in color to Felix Crousse).......................... $0.75 $1.25 $1.75

**Aurore.** (Dessert, 1904). Pale lilac-white, lighter collar, slightly flecked with crimson. Large, flat, loose; medium height; compact bush. Late 1.00 1.50 2.00

**Avallanche.** (Crousse, 1886). Creamy-white, slightly flecked with carmine. Large, compact, crown type; fragrant; strong growth. Nothing better. Often sold under name of Albatre. Midseason 1.00 1.50 2.00

**Baroness Schroeder.** (Kelway). Flesh, fading to milk-white. Large globular, rose type; very fragrant; strong, free bloomer. Midseason...... 1.50 2.00 2.50

**Berlioz.** (Crousse, 1886). Bright currant-red. Large compact, globular; strong growth; medium height. Late midseason.......................... .60 .85 1.25

**Boule de Neige.** (Calot, 1882). Milk-white, flecked with crimson. Very large, regular and compact; tall, erect growth. Very early midseason. (Similar to, but earlier than Mons. Dupont).................. .60 .85 1.25

**Canari.** (Guerin, 1861). Guards amber-white, tinted pink; center clear yellow fragrance X. Late.......................... .60 .85 1.25

**Carnea Elegans.** (Calot, 1868). Soft flesh color flecked with crimson. Large, flat, compact, rose type; fragrant; medium height. Professor Saunders well says: “Indoors they preserve an enchanting combination of flesh color and pale yellow.” .75 1.25 1.75

**Claire Dubois.** (Crousse, 1886). Even, clear, satiny pink, tipped white. Very large, globular, rose type; tall, erect, strong growth. Delicate fragrance. Very late.......................... 1.00 1.50 2.00

**Couronne d’Or.** (Calot, 1873). White with yellow tints arising from a few stamens showing amidst the petals. Center petals tipped with carmine. Large, rather full flower of superb form. Strong grower and very free bloomer. Good keeper. Late.......................... .60 .85 1.25

**De Candolle.** (Crousse, 1859). Uniform bright lilac-purple. Very large, full, rose type; without fragrance; medium height; strong erect grower. Late midseason.................. .50 .75 1.00

**Delachel.** (Delache, 1856). Violet-crimson. Medium size; fairly compact; rose type; strong, erect, vigorous growth. Midseason to late. .................. .50 .75 1.00

**Dorélatissima.** Very pale lilac-rose. Large, rose type; very strong, vigorous growth; medium height. Midseason........................... .60 1.00

**Denis Helye.** (Verdier). Snowy red, large and full flower; strong grower of medium height. Midseason to late. .................. .60 .85 1.25

**Directeur Aubrey.** (Crousse, 1879). Clear amaranth. Medium to large, full globular; medium height. Late midseason.................. .50 .75 1.00

**Docteur Bretonneau.** (Guerin, 1850). Guards flesh-pink, center yellow, sometimes salmon. One of the best yellow sorts. Midseason. .................. .75 1.00 1.50

**Docteur Bretonneau.** (Verdier, 1854). (Synonym, Lady Bramwell). Pale lilac-rose with some crimson flecks. Medium to large, bomb shape; pleasing fragrance. Early midseason.................. .50 .75 1.00

**Dorchester.** (Richardson, 1870). Pale pink. Large, compact, rose type; fragrant; medium height; strong, thick stems. Late midseason.............. .75 1.25 2.00

**Duc de Wellington.** (Calot, 1859). Pure white, sulphur center. Large, bomb shape; very fragrant; tall, erect growth. Midseason.................. .50 .75 1.00

In comparing prices with those of other growers, please note that we do not offer divisions, but strong one, two and three-year plants; and also that we offer very liberal discounts on page 5. As to the quality of our plants, please note a few of the many letters of commendation received.

Golden Harvest. (Rosen-1-year field, 1900). Pale pink to peach blossom pink, white crown. Rather dwarf type; Not so strong and free as *Jeanne d'Arc*, although called by some identical. Midseason. $0.60 $0.85 $1.25

Grandiflora. (Richardson, 1883). Beautiful flesh-pink, with lighter shades at the center. One of the very largest pinks known, and one of the latest pinks to bloom. Vigorous 1.25 2.00

Grandiflora *Nivea Plena* (Lemon, 1824). Pure white with crimson dots in center. Very large, globular, rose type; fragrant; strong growth. Early 1.00 1.35 2.00

*Henry Murger*. (Crousse, 1855). Uniform pure mauve. Very large, globular, rose type; strong, erect growth. Late .75 1.00 1.50

*Insignis*. (Guérin, 1850). Deep Carmine - rose collar, light peach blossom center. Pleasing fragrance; tall, strong, vigorous. Midseason .60 .85 1.25

*James Kelway*. (Kelway). Rosy white. Very large, loose, rose type; fragrant; tall. Mid-season 2.00 2.50

*Jeanne d'Arc*. (Calot, 1858). Guards and center pale lilac-rose, collar cream - white, retaining a rich yellow if opened indoors. Medium to large, crown shape; fragrant; strong growth, free bloomer. Early midseason. One of the choicest old varieties. Peach blossom-pink and cream, reminds one of peaches and cream. .75 1.00 1.50

Juliette Dessert. (Dessert, 1888). Dark crimson. Compact, globular, rose type. Tall, vigorous, Free bloomer. Midseason 1.00 1.50 2.00

*La Coquette*. (Guérin, 1861). Light pink crown and collar, center very white with carmine flecks. Large, globular, high crown; fragrant. Midseason .60 .85 1.25

*Lady Curzon*. White guard with cream center. Award of merit at Royal Horticultural Society. Midseason 2.00 2.50 3.00

*Lamartine*. (Calot, 1866). (Also called Gigantea). Pale lilac-rose, darker center. Very large, loose, irregular, rose shape; very fragrant. Early 1.00 1.50 2.00

*La Rosiere*. (Crousse, 1888). Pure white, shading to cream in center, due to presence of yellow stamens. Large, flat, semi-double; medium height. Name is well chosen, for it is more like a rose than any other Peony. Midseason .75 1.25 1.75

*La Tendresse*. (Crousse, 1886). Cream color, changing to pure white, slightly splashed carmine; rose type, very large, compact, flat; fragrant. Strong, upright growth. Early 1.50 2.25 3.00

*La Tulipe*. (Calot, 1872). (Syn. Multicolor Calot, '73). Lilac-white, outer petals striped with crimson. Large, flat, rose type; fragrant; very tall, midseason. 1.00 1.50

*Lemon Queen*. (Japan). Pure white with a central cushion of short, fringed, yellow petals. 1.50 2.00 2.50

*L'Indispensable*. Delicate shell-pink. Exceedingly beautiful flower when conditions of soil and weather are favorable to its full development, but its extremely hard bud is so long in opening that it is pretty sure to get water logged by a shower before it develops. Sold by some as Eugene Verdier at an enormous price. .60 .85 1.25

*Livingstone*. (Crousse, 1879). Pale lilac-rose, silver tipped, some carmine spots. Large, compact, rose type; tall, very strong stems. Late .85 1.25 1.75

*Mme. Auguste Dessert*. (Dessert, 1889). Glossy flesh, slightly tinged carmine; center flecked crimson. Very large, imbricated, cup-shaped flower, rose type; erect; medium height. Early midseason 2.00 2.75 3.50

Mme. Barillet-Deschamps. (Calot, 1868). Clear violet-rose, fading to a delicate silvery-pink. Large, flat, imbricated rose type; fragrant; medium height. Midseason...........................................$1.00

Mme. Barillet. (Calot, 1867). Pale lilac-pink, silvery reflex. Large, compact, rose type; upright; medium height. Late midseason..........................60 .85 1.25

Mme. Bucquet. (Dessert, 1869). Uniform velvety-crimson, with garnet tints. Large, loose, rose type; fragrant; strong, upright growth. Midseason ..........................................................75 .35 1.50

Mme. Boulanger. (Crousse, 1886). Glossy soft pink, tinged lilac, very fine, compact, rose type; upright. Late midseason.........................1.50 2.25

Mme. Calot. Flesh white, tinged pale hydrangea-pink, center shaded slightly darker with a sulphur tint; very large, full, globular bloom; fragrant; early and abundant bloomer. On well established plants the flowers are exquisite. Late ......................75 1.00 1.50

Mme. Crousse. (Crousse, 1887). Uniform deep pink with dark shades. Large, globular, perfect rose type; fragrant; medium height. Late ........................................................................1.00 1.50 2.00

Mme. Chaumy. (Calot, 1864). Pale lilac-rose, center slightly darker Medium size; very compact, rose type; very free; medium height. Very late...............................................................50 .75 1.00

Mme. Coste. (Calot, 1873). Pale hydrangea-pink, creamy-white collar, flecked with crimson. Medium size; crown shape; medium height. Early ........................................................................50 .75 1.00

Mme. Crousse. (Calot, 1866). Pure white with faint crimson markings Large, globular, crown type; fragrant; medium height. Midseason..........................75 1.00 1.30

Mme. de Galhau. (Crousse, 1883). Delicate pink with a rose-white center. Very large, compact, rose shape; very fragrant; strong growth. Late ........................................................................75 1.00 1.50

Mme. de l’Hour. (Calot, 1864). Light pink, silver tipped, darker center. Large, compact, rose type; tall; erect, superb. Late midseason ......1.00 1.50 2.00

Mme. Ducet. (Mechin, 1880). Bright silvery pink. Very large, well built flower; strong grower, free bloomer; odor pleasant; one of the best. Early ........................................................................75 1.25 2.00

Mme. de Vatry. (Guerin, 1863). Milk-white, lilac-white collar, center splashed with crimson. Very large, full, crown shape; medium height; strong grower. Midseason........................................75 1.00 1.50

Mme. de Verneville. (Crousse, 1885). Pure white, center tipped with crimson; large, compact, rose type; fragrant; medium height; strong growth. Early ..........................................................75 1.00 1.50

Mme. Emile Galle. (Crousse, 1881). Very soft pink, changing to milk-white in center. Very large, compact, flat, rose type; tall, strong; fragrant. Early ..........................................................75 1.00 1.50

Mme. Emile Lemoine. (Lemoine, 1899). Glossy white, tinged pale pink and covered with tiny dots of deeper shade. Large, globular, rose type; a strong grower, good bloomer. Midseason...........................................1.75 2.25 3.00

Mme. Forel. (Crousse, 1851). Light pink, silver-tipped center. Very large, compact, rose type; fragrant; tall, strong growth. Late ..........................................................75 1.00 1.50

Mme. Geissler. (Crousse, 1889). Violet-rose, tips silvery white, compact, rose type. The largest in our collection. Fragrant. Late midseason ..........................................................1.00 1.50

Mme. Lemoine. (Calot, 1864). Clear violet-rose, slightly tinged carmine. Large, full, globular bloom. Late midseason ..................................................1.00 1.50

Mme. Muyssart. (Calot, 1869). Uniform dark pink, tipped silver. Very large, compact, rose type; fragrant; tall, strong stems. Very late .................................................................75 1.00 1.50

Mlle. Marie Calot. (Calot, 1872). Milk-white tinged flesh, flecked crimson. Large, compact, irregular petals; fragrant; medium height; strong. Late .........................................................1.25 1.75 2.25

Mlle. Henee Dessert. (Mechin, 1889). Fine lilac, silver-tipped, Large, globular, rose type; extra strong stem; medium height. Midseason.................75 1.00 1.50

Mlle. Rousseau. (Crousse, 1886). Milk-white, splashed carmine. Large, globular, rose type; extra strong stem; medium height. Midseason...........1.00 1.50 2.00

Marechal McMahon. Identical with Aug. d’Hour, which see.

Marguerite Gerard. (Crousse, 1892). Very pale salmon-pink, fading to almost white. Large, compact, rose type; very strong growth. Midseason .................................................................1.50 2.25 3.00

Mme. Barillet. (Calot, 1866). Pale white fading to milk-white. Large, compact, rose type; fragrant; tall, on strong stem. Very late ........................................75 1.00 1.50

Marie Deroux. (Crousse, 1851). Lilac-white with lilac collar. Large, medium compact, flat, rose type; strong, tall grower. Late ......................................................75 1.00

Marie d’Hour. (Calot, 1883). Pale pink, darker center, flecked carmine. Large, rose type; erect. Midseason ..........................................................50 .75 1.00

Marie Jacquin. (Verdier). (Syn. Water Lily). Rose-white, fading to white. Large, globular, double; upright, very strong growth; cup-shaped. Midseason...........................................1.00 1.50 2.00

Marie Lemoine. (Calot, 1869). Pure white with cream-white center. Large, very compact, rose type; pleasing fragrance; medium height; extra strong stems. Very late..........................................1.00 1.50 2.00

Mathilde de Rosenne. (Crousse, 1883). Flesh-pink shaded chamois, with a narrow carmine edge. Fragrance XX. Tall, strong grower. Late..................60 .85 1.25

FROM PENNSYLVANIA

"Last fall I purchased two lots of peony plants from you, and a neighbor of mine wants me to duplicate that order for her."

FROM PENNSYLVANIA

"Herewith I am enclosing an order for a few peonies. I wish that you would give this order the same careful attention that you have given to my orders heretofore, as the peonies sent to me by you last fall were the finest I have ever planted; and I have been planting them for over forty years, now having between 500 and 600 plants."

FROM MAINE

"— Judging from the quality of the peonies we purchased from you last year, we can trust our future orders to you."

FROM NEW YORK

"I am in receipt of your catalogue this morning and wish to thank you for same. You may remember filling my order a while ago for peonies and I write to say that I had splendid success with all the plants. They were simply wonderful, and excited the admiration of my neighbors and also that of all observers."

FROM MINNESOTA

The box expressed to me arrived about two weeks late. However we have them all set out and I don't think I ever saw finer roots than are on them; they are simply wonderful and I know they will all do nicely.

FROM CONNECTICUT

The plants ordered arrived Saturday in excellent condition and I was very much pleased with them; also with the fine way in which they were packed. I shall be glad to tell others about it.

FROM NEW YORK STATE

I am very much pleased with vines and fruit trees I bought of you, and delighted with the maples. They have already started to grow.

In her book on "The Peony," Mrs. Edward Harding says: "I know of no plant that is so satisfyingly beautiful in every stage of its development. . . . . . . .When the blossoms appear it is indeed hard to leave the garden; no matter how many times a day one gazes at them, there is something newly entrancing on each successive glance."
Single Peonies

Clio. Light pink; large flower; grand keeper.............................. 1-year 2-year 3-year
Chleirette. (Dessert, 1896). A superb, large white, lightly shaded pink,
changing to pure white.................................................. 1.50 2.00 2.50
Hermes. Delicate hydrangea-pink.................................................. .50 .75 1.00
Kamoio-Kerogomo. (Japan). Large, crimson-carmine; large central tuft
of filamentous petals, golden-yellow streaked with carmine........... 2.50 3.00 2.50
Kinokino. (Japan). Crimson-carmine, tinged with garnet; central tuft
of filamentous petals, carmine-red, bordered with yellow........... 2.00 2.50
La Fiancee. (Dessert, 1902). Very large, white with yellow center.
Single. Early. Good variety. Carpels greenish-white and hairy;
stigmas long, white and recurved. Odor slight. Plant is strong,
coarse grower, with a very spreading habit. Free bloomer. Character-
istic coarse, thick, leathery foliage; a third larger bloom than the
ordinary Albaflora.................................................. 1.50 2.00
L'Eteineclante. (Dessert, 1902). Very broad petals of the finest bright car-
mine, broad silvery border, crown of gold stamens at the center; superb 1.50 2.00

peony .................................................. 1.00 1.50
Tenuifolin, fl. pl. Double fennel-leaved flowers of a bright scarlet-crimson,
and quite double and globular; rare and fine.................................. 1.00 1.50

Types of Peonies

Single. Those with a single row of wide guards, and a center of yellow pollen-bearing stamens.
Semi-Double. Those with several rows of wide petals, and a center of stamens and partially
transformed petaloids.

Japanese. These have wide guards the same as the Singles, but with the
stamens and antlers greatly enlarged into narrow, thick, petaloids
of various colors, tipped with vestiges of the yellow antlers without pol-
en.
Anemone. A step farther in the process of doubling with the stamens
all transformed into short, narrow petals, forming a round cushion in
the center of the flower.
Crown. In this type wide petals are developed in the center of the flower,
forming a high crown, with the narrow, short petals forming a ring or
collar around it. Often crown and guards are of one color and the collar
another, or lighter shade.
Bomb. The next step in which all the center petals are uniformly
wide, approaching the guards, but distinctly differentiated from them,
forming a globe-shaped center without collar or crown.
Semi-Rose. Flowers in which the petals are all
uniformly wide, but are loosely built, with a few
pollen-bearing stamens visible, or nearly con-
cealed.
Rose. The process of doubling is completed, all
stamens fully transformed into evenly arranged,
wide petaloids, similar to the guards, forming a
perfect rose shaped bloom.
Hardy Perennials

From the beginning the Rosedale Nurseries have made a leading specialty of Perennials. While we do not carry a large number of varieties, yet we grow a very select list of the best and hardest. Heavy, $2.50 per dozen; Extra Heavy, $3.50 per dozen; except as noted. Six of a kind at dozen rate. A few very large clumps at 50 cents each.

ACHILLEA Ptarmica f. pl, The Pearl.

AQUILEGIA.
- California Hybrids.
- Canadensis.
- chrysantha.
- caerulea.
- Erskine Park Hybrid.

ASCLEPIAS tuberosa (Butterfly Weed).

- Novae-Anglia—Anglica roseus.
- St. Ewig.
- J. S. Ware.

BOLTONIA (False Chamomile).
- asteroides.
- latissquama.

CAMPANULA (Bellflower).
- Carpathian.
- Carpathia alba.
- gigantea Moerheim.
- rotundifolia (Blue Bells of Scotland).
- Medium (Canterbury Bells).
- Medium roseum.

CENTAUREA.

CHELONE (Shell-flower).
- Lyoni.

CHRYSANTHEMUM (Moonpenny Daisy).
- maximum Triumph.
- Shasta Daisy.
- Hardy Pompoms.

CLEMATIS, Shrubby.
- Davidiana.
- recta.

COREOPSIS lanceolata grandiflora.

CONVALLARIA (Lily-of-the-Valley). (See below.

DELPHINIUM (Hardy Larkspur).
- Belladonna.
- Chinense.
- Erskine Park Hybrids.
- formosum.
- formosum coelestinum.
- Gold Medal Hybrids.

DIANTHUS barbatus (Sweet William). $1.50 per dozen.
- deltoide (Maiden Pink).
- Newport Pink. $2.00 per dozen.
- plumosus sempervirens. (Garden Pink).

DICENTRA (Bleeding Heart).

DICTAMNUS (Gas Plant).
- fraxinell.
- fraxinella alba.

DIGITALIS—Foxglove.

DORONICUM excelsum (Leopard’s Bane).

ERYNGIUM (Sea Holly).
- amethystinum.

EULALIA. (See Grasses).

FORGET-ME-NOT. (See Myosotis).

FOXGLOVE. (See Digitalis).

FUNKIA (Plantain Lily).
- caerulea.
- subcordata grandiflora.
- undulata media plia.
- Thos. Hogg.

GAILLARDIA grandiflora (Blanket-Flower).

GRASSES, Hardy Ornamental.
- Erinathus Raveanne.
- Eulalia graecelima univittata.
- Eulalia Japonica variegata.
- Eulalia Japonica Zebrina (Zebra Grass).

GYPSOPHILA (Baby’s Breath).
- paniculata.
- repens.
- dore deno (Double-flowering).

HELENIANTHUS (Hardy Sunflower).
- multiflorus f. pl. (Double Hardy Sunflower).
- multiflorus maximus.
- oryzastrum.
- woolly dood.

HELIOPSIS Pitcheriana (Orange Sunflower).

HEMEROCALLIS aurantiaca major (Yellow Day Lily).
- flava. (May and June).
- Kwanus f. pl.
- Thunberghi. (July).

HEUCHERA Sanguinea.

HEUCHERA Sanguinea alba.

HIBISCUS (Rose Mallow).
- albus (Crimson Eye).
- Moschetos.
- roseus.

HOLLYHOCK (Althea Rosea).
- Double; (Blue Bells of Scotland).
- Allegheny Fringed.
- Old-fashioned Single.
- Newport Pink.

LIATRIS pycnostachya (Kansas Gay Feather).

LILY-OF-THE-VALLEY. Heavy clumps, 35 cents each; $3.50 per dozen.

LUPINES.

LYCHNIS alpina (Campion; Lamp-flower).

MAYWEATHER.

MONARDA (Bee Balm).
- didyma (Oswego Tea).

MYOSOTIS.

PAPAVER alpinum (Alpine Poppy).
- nudicaule (Iceland Poppy).
- orientale (Oriental Poppy).

PENTSTEMON (Beard-Tongue).
- Barbatus Torreyi.
- Pubescens.

PHYSOSTEGIA Virginica (False Dragon-Head).

PLAYTCODON (The Balloon Flower).

GRASSES, grandiflora album.

Mariesa.

PRIMULA veris superba.

PYRETHRUM roseum.

RUDBECKIA (Cone-flower).

ROSE CAMPION.

SEDUM (Stonecrop).

SENECIO.

STATICIA latifolia.

STOKESIA alba cyanaca.

TRITOMA Pflzneri (Torch Lily).

VERONICA (Speedwell).
- longifolia subsessilis.
- spicata. $1.00 per dozen.
- VINCIA cereslum minor (Myrtle, or Periwinkle).
- $1.50 per dozen. $10 per 100.

VIOLA cornuta (Tufted Pansy).

Yucca filamentosa (Adam’s Needle). 25 to 50 cents.

From Pennsylvania:

"You will remember you made me a plan for a hardy border several years ago, made up of Peonies, Phlox, Physostegia, etc., and also sold me the plants. It has been a ‘joy forever.’"
Japanese Iris

**Japanese Iris**

**READY AFTER AUGUST 15**

Flower nine to twelve inches in diameter; will grow in almost any soil that does not become too dry in summer. Prefer a warm, sunny location.

**Prices**

- 30 cts. each, $3.00 per dozen; $20.00 per hundred. A superb mixture made from these varieties, $15.00 per hundred. Six at dozen rate, fifty at hundred rate, provided not less than three of a name are ordered.

This set of varieties was selected from a large number of the best Japanese introductions and is, without doubt, as fine as any collection offered. **Order by number.**

4. **Yomo-no-umi.** The finest double white.
5. **Koki-no-iro.** Light violet with white veins.
11. **Hano-no-nishiki.** Violet-purple veined with white.
14. **Shishi-ikari.** White ground, veined with dark purple.
15. **Gekka-no-namid.** Dense, pure white, yellowish blottches, petaloid stigmas; six petals.
20. **Kuma-Funjin.** Purple, overlaid with navy-blue, two standards; petaloid stigmas purple and blue; large orange blottches; six petals.
43. **Purple, overlaid with navy-blue, two standards; petaloid stigmas purple and blue; large orange blottches; six petals.**
61. **Blue Jay.** Sky-blue, veined white.
65. **Hoo-ojo.** Ruddy crimson, primrose blottches, with white halo; petaloid stigmas white tipped with purple; six petals.
67. **White, medium height.**
71. **Pyramid.** Dark violet—blue, slightly veined white; very fine...
72. **Six round petals; bright violet-purple, shaded with blue.**
77. **Yayaara.** White, occasionally marked with light violet.

---

**FROM INDIANA**

"Dear Sir:—The peonies and irises have arrived in good shape and I wish to compliment you on the quality of roots sent."

---

**Victory Iris**

(german)

**READY AFTER AUGUST 15**

**LARGE STOCK, LOW PRICES**

Extra heavy, named, 15 cts. each; $1.50 per dozen; $10.00 per hundred. Except as noted. Six at dozen rate, fifty at hundred rate; provided not less than three of a kind are ordered.

- Heavy mixed, per dozen, $1.00; per hundred, $7.00.

The German Irises are all sun lovers and thrive best in warm, fertile, well-drained soils. Their roots lie near the surface of the ground and require the warming, baking rays of the sun. They will thrive on almost any kind of soil except one that is continuously wet.

The following abbreviations are used: S means standards or upper petals; F means falls or lower petals.

**Apollo.** Golden-yellow, striped with plum color. *I. Chereau.* Deep yellow, marked with maroon, giving a cupperry hue.

**Aurea.** (Variegata.) Rich orange-yellow. 35 cts. each; $3.00 per dozen.

- Bessie. S yellow; F brown; dwarf.

**Black Prince.** (Not the English.) Earliest, rich, deep purple. 35 cts. each; $3.50 per dozen.

**Celeste.** Pale azure blue.

**Coceleste.** Delicate lavender-self.

**Common Purple.** Purple. One of the best. 25 cts. each; $2.00 per dozen.

**Darius.** S rich canary-yellow; F. lilac, margined white; rich orange beard; one of the most distinct and beautiful. 25 cts. each; $2.00 per dozen.

**Dorothea.** Marked white, tinged lilac. 35 cts. each; $4.00.

**Fair.** White, delicately bordered and suffused soft blue. 2 feet. 20 cts.

**Florentina nana.** Creamy-white, faintly flushed lavender; the blooms are quite fragrant. Two feet. 25 cts. each; $2.00 per dozen.

**Florida.** S citron-yellow; F deeper yellow. Beautifully veined 18 inches.

**H. Cramer.** Delicate pale blue.

**Jacquesiana.** S bright coppery crimson; F rich maroon; very handsome. Scarce. 25 cts.

**Lorely.** S color of breast of wild canary; F creamy-white with purple reticulations, blending into a velvety purple mass near the ends which are margined with deep canary. Very prolific. 25 cts. each; $2.50 per dozen.

**Monsignor.** S rich satiny violet; F velvety purple-crimson with lighter margin. Large flowers. Very late. Beautiful. $1.00.

**Mrs. Neubrunner.** Deep golden-yellow; darker than Aurea. 35 cts. each; $3.50 per dozen.

**Mrs. H. Darwin.** 30 ins. Late. S pure white; F white, finely reticulated. One of the most charming whites.

**Niesbelugena.** S fawn-yellow; F violet-purple on bronze. Very large 50 cts.

**Lady Stump.** Lavender and dark blue.

**L'Avenir.** Lavender; a beautiful shade.

**La Tendre.** S pearly white, somewhat smoked; F blue.

**Lieblich.** S yellow; F maroon; fine.

**Madame Chereau.** White, elegantly frilled with wide border of clear blue; one of the most beautiful. 32 inches.

**Orfeo.** S rich blue; F deep dark velvety purple; very tall and handsome.

---

**Madame Chereau**
Phlox—Miss Lingard

GERMAN IRIS Continued—

Prosper Laugier. S light bronze-red; F velvety ruby-purple, with orange beard. Very handsome. 75 cts.

Queen Alexandra. S fawn, shot with lilac; F lilac, reticulated bronze at base. Beard yellow. Very beautiful. 30 inches. 50 cts.

Wyoming. S creamy white suffused delicate soft rose; F deep rose base, shading to flesh-colored border. 75 cts.

Pallida Section

Albert Victor. S soft blue; F beautiful lavender; large and fine. 40 inches. $2.00 per dozen.

Garibaldi. Similar to Her Majesty but deeper pink. $2.50 per dozen.

Her Majesty. New S rose-pink; F bright crimson, tinged a darker shade. 30 cts. each; $3.00 per dozen.

Dalmatica. S lavender; F clear deep lavender; flowers very large, extra fine. A grand variety for massing and for cut flowers. 30 cts. each; $3.00 per dozen.

Junnita. S and F clear blue, deeper than Dalmatica. Tallest of all the beardless Irises; foliage long and drooping; flowers large and fragrant. 35 cts. each; $3.50 per dozen.

Lohengrin (Pallida). S and F, soft silvery-mauve, shading nearly to white at the claw. One of the Pallidas. 33 inches. 30 cts. each; $5.00 per dozen.

Speciosa. S dark lavender, shaded lighter; F lavender, shaded bright purple. 42 inches. $2.50 per dozen.

Queen of May. A lovely soft rose-lilac, almost pink; beautiful. $2.00 per dozen.

New Hardy Alpine Irises

Fine Mixture, $2.00 per dozen, $12.00 per hundred

These are perfectly hardy and useful for border or for forcing. They bloom before German Iris.

Various Irises

$1.50 per dozen; $10.00 per hundred

Pseudacorus (Common Water Flag). Whoever has in his garden a pond, ditch or even a thoroughly damp spot ought to plant this Flag. Two to three feet high, with narrow, grassy leaves; showy blue flowers beautifully veined with white and violet.

Sibirica (Siberian Flag). Two to three feet high, with narrow, grassy leaves; showy blue flowers beautifully veined with white and violet.

Pamela Violacea. Light purple, large flowers; very rich and effective when bordering the taller forms.

Phlox

Following the Iris and Peonies in time of bloom, but in no way behind them in popularity, are the Hardy Perennial Phloxes. We have weeded out all the magentas and purples and believe that our list is as select as that offered by any firm.

Bloom ing size, 20 cts. each; $2.00 per dozen; $15.00 per 100, except as noted. Large clumps, 25 cts. each; $2.50 per dozen; $20.00 per 100. Six at dozen rate, fifty at hundred rate, provided not less than six of a kind are ordered. Varieties at 30 cts. each; $3.00 per dozen.

America. Salmon-pink, deep pink eye. 35 cts.

Bridesmaid. White, with large crimson center. 30 cts.

Colette. Fine, rich scarlet with deep carmine eye. 30 cts.

Dawn. Light delicate pink, darker center; free bloomer, medium height. 30 cts.

Eiffel Tower. Large flowers; chaste, pure salmon with purple eye; Tall grower. 25 cts.

Elizabeth Campbell. Very bright salmon-pink, with lighter shadings and dark red eye; one of the handsomest. 30 cts.

Eugene Dauzanviller. Lilac, shading white at the edges. 25 cts.

Europe. White with decided crimson-carmine eye; individual trusses and flowers very large; sturdy, erect habit. 30 cts.

Henry Murgar. White with carmine eye. 30 cts.

Independence. Large, pure white. 25 cts.

La Canard. Pure white, strong grower. 25 cts.

Lothair. Large; rosy-salmon, with crimson eye. 25 cts.

Matador. Large flower; bright orange-red Distinct and fine. 25 cts.

Miss Lingard. Bloom in May, fully six weeks earlier than the other sorts, and continues in bloom three months; a grand white variety, which should be in every collection. 30 cts.

Rynstrom. A grand new Phlox, resembling Pantheon but with larger flower heads; a soft, clear pink, medium height and strong grower. 25 cts.

Von Lossburg. Purest white, individual flowers very large. 25 cts.

W. C. Egan. One of the finest Phloxes yet introduced and while the individual flowers according to the color chart are of a delicate lilac color, illuminated by a large bright solferino eye, the color effect as a whole is a delicate pleasing shade of soft pink. 25 cts.

Creeping Phlox

amoena rosen. Beautiful plant and pretty pink flowers; very early. 5 inches.

subulata (Moss Pink). Rose-pink; blooms in May; useful for trailing over rocks.

We are always glad to assist our customers in making a selection of Peonies, Phlox, Iris, etc. Please state fully the results desired, size of plot to be planted, etc.
Fall Planting

PEONIES—of course and HARDY PERENNIALS too. But also many other species. Whenever possible, fall planting should be practiced. Here are some of the reasons:

1. The roots of Fruit and many other hardy Deciduous Trees and Shrubs either form calouses or make rootlets preparatory for spring growth. If planted in spring (especially late) the leaf growth makes a greater demand for food than the roots are ready to supply. Consequently, either failure or small growth results. Thus a half year may be gained by Fall Planting.

2. Perennials planted early in autumn become thoroughly established for early spring growth and practically a year is gained. But they must be planted early; September 1 to 15 is best. Like the Peony, some should never be planted in the spring, and the earlier in the fall after September 1, the better.

3. Time for planting in autumn at Tarrytown covers a period of four (4) months; August to November inclusive; starting with Evergreens and ending with Deciduous Trees and Shrubs. While springtime is scant two (2) months—April and part of May.

4. Soil and Weather Conditions are usually more suitable in fall. Often a cold wet April not only hinders planting but the soil is not in that pliable condition it should be for pleasant and successful operations.

5. Help is always in greater demand in spring because of renewal in all kinds of business. Thus it may be difficult to set out plants promptly on arrival. Owing to longer season in autumn, prompt planting is not so necessary as the trees may be heeled in, awaiting convenience of the planter.

Coniferous Trees

No planting is complete without evergreens. They are beautiful always. Come to see our LARGE SIZES FOR IMMEDIATE EFFECT. SPECIMENS UP TO 25 FEET IN HEIGHT, in Several Varieties (See Illustration): Pines, Re-tinsel Pines, Hemlocks and Spruces, all of which may be safely moved.

Nearly 70 varieties are prosperous at ROSEDALE. Their beauty and charm are yours at:

"Prices as Low as Consistent with Highest Quality"

Douglas Fir—A beautiful and hardy evergreen with plumelike branches. E. H. Wilson says of it, "Either as a lawn tree, for avenues or for massing, the Douglas Fir is equally valuable and it needs no comment."

Douglas Fir
Deciduous Trees

From the reasons given on the opposite page it follows that, for all trees that may be safely planted fall is the best time. We have listed here a few varieties. Mail us your full list of wants and we will be pleased to hold until spring those that would not be safely planted in the fall.

Dogwood, White-flowering— Each 10
4 to 5 ft. $1.50 $10.00
5 to 6 ft. 2.00 15.00
6 to 7 ft. 2.50 22.50
7 to 8 ft. 3.00 27.50
8 to 10 ft. 3.50 32.50
Larger Specimens $4.00 to 15.00

Pink-flowering (rubra)— Each 10
3 to 4 ft. $2.75
4 to 5 ft. 3.50
5 to 6 ft. 5.00
6 to 7 ft. 7.00
7 to 8 ft. 9.00
8 to 9 ft. 12.00

Double White— Each 10
4 to 6 ft. $3.50
6 to 8 ft. 5.00
8 to 10 ft. 6.00

Kousa, Japanese— Each 10
4 to 5 ft. $3.00
5 to 6 ft. 4.00
6 to 7 ft. 5.00

Wp. Dogwood— Each 10
4 to 5 ft. $5.00
5 to 6 ft. 6.50

Elm, American— Each 10
8 to 10 ft. $1.75 $15.00
1½ to 1½ in. caliper, 10-12 ft. 2.50 22.50
1¾ to 2 in. caliper, 12-14 ft. 3.50 32.50
2½ to 3 in. caliper, 14-16 ft. 4.00 37.50
Larger Specimens $4.00 to 25.00

Huntington— Each 10
15 to 20 ft. $3.50 to 5.50

Horse-Chestnut, Common White— Each 10
8 to 10 ft. $2.00
10 to 15 ft. 2.50
Larger Specimens $3.00 to 5.00

Double White— Each 10
8 to 10 ft. $2.50
10 to 12 ft. 3.50
12 to 14 ft. 5.00

Pink— Each 10
10 to 12 ft. $2.00
12 to 15 ft. 2.50

Maple, Norway— Each 10
1½ to 1½ in. caliper, 12-14 ft. $1.75 $15.00
1¾ to 2 in. caliper, 12-14 ft. 2.50 22.50
2 to 2½ in. caliper, 14-16 ft. 3.00 25.00
2½ to 3 in. caliper, 16-18 ft. 4.50 35.00
3½ to 4 in. caliper, 18-20 ft. 6.00 45.00
3½ to 4 in. caliper, 18-20 ft. 8.00 50.00
4 to 8 in. caliper, 20-23 ft. $10.00 to 35.00

Reitenbach— Each 10
12 to 14 ft. $2.00 to 3.00
14 to 16 ft. 3.00 to 4.00
Larger Specimens $5.00 to 10.00

Schwedler’s Purple— Each 10
12 to 15 ft. $4.00 $37.50
15 to 18 ft. 2½-3 in. caliper $4.50 to 6.50
Larger Specimens $5.00 to 40.00

Sugar— Each 10
12 to 14 ft. 1½ to 2 in. $2.00 $17.50
14 to 16 ft. 2 to 2½ in. 3.00 30.00
16 to 18 ft. 2½ to 3 in. 5.00 45.00
Larger Specimens $5.00 to 35.00

Wieri— Each 10
8 to 10 ft. $1.50 $12.50
10 to 12 ft. 2.00 17.50
12 to 15 ft. 3.00 30.00
Larger Specimens $8.00 to 15.00

Silver— (Dasycarpum)— Each 10
10 to 12 ft. $2.00 $17.50
12 to 14 ft. 2.50 22.50
14 to 18 ft. 3.00 30.00

ROSEDALE GROWS A LARGE VARIETY OF FLOWERING SHRUBS.
Many of Them In Extra Sizes for Immediate Effect.

Fruit Trees

Our offer of bearing size Fruit Trees has never been equal to the present. You will do well to try some this Fall and have others reserved for Spring. We could not supply late orders last Spring, so great was the demand for large fruit trees.

Your order for fruit not listed below will be given prompt attention in Spring.

Apples— Each 10
First-class, 5 to 7 ft. $7.50 $7.00
First-class, 7 to 9 ft. $1.50 to 1.75
Dwarf, 2 to 3 ft. .75 6.50
3 to 4 ft. .75 7.00
4 to 8 ft. $1.25 to 3.00

Pears—
Standard, 5 to 7 ft. .75 7.00
XXX, Transplanted $1.25 to 3.00
Dwarf, 2 to 4 ft. .50 6.50
XXX, Transplanted .75c to 1.50

Grapes—
First-class, 1 and 2-year. .50 4.00
First-class, 3-year, trans. .75 6.00
First-class, 4- and 5-yr. trans. 1.00 8.00

Currants— Two year.
Fay’s Prolific .30 2.50
Perfection .35 3.00
Gooseberries .50 4.00
THE ROSEDALE AIM

The stability of any structure is in proportion to the energy spent upon the details of its foundation. ROSEDALE NURSERIES emphasize these. Read WHY and HOW.

THE natural tendency of roots, left to themselves, is to spread widely. Note where the bulk of the feeding roots are developed. In digging this tree nearly all were cut off and the foundation of the tree was lost.

This tree has been oft transplanted. All Rosedale trees are. The result is a compact mass of fibrous roots close to the trunk. Thus the foundation is safe from the digger's spade and you are insured against loss or tardy growth.

The roots of ROSEDALE FLOWERING SHRUBS are given the same treatment as the Evergreens and Deciduous trees. Because of this you can buy large sizes as safely as smaller ones.

If you have horticultural problems, let us help you solve them. That is our business. We are prepared to make old places new and new places old—old places planted with bright, new trees, and new places made old by planting large trees for immediate effect.

Visitors are welcome any day except Sunday. Location on the Saw Mill River (State) Road, 1 1/4 miles north of the Westchester County Almshouse at East View, 1 1/4 miles from Hawthorne, on Harlem R. R., and one hour from New York. Carriages meet all trains at Hawthorne.

ROSEDALE NURSERIES, Telephone 628 TARRYTOWN, N. Y.
